Memorandum

To: D. Carlson Attn.: P. Pechnick
From: Gary Gould By: Peter J. Frantz
Subject: Hazardous Waste Review
Date: June 22, 1995

A handwritten signature in cursive script, reading "Peter J. Frantz".

Refer to: FAP 340
Job No. P-91-315-86
Spring Creek Wetland Mitigation Site
Will County
ISGS #26E

Attached is a copy of the letter report regarding a historical review conducted by the Illinois State Geological Survey (ISGS) for the subject project as described in your Hazardous Waste Survey Request.

It is the opinion of this office, based on the historical search and the District's field review documentation that the project should have no involvement with hazardous substances, that this project would rank as a no or low risk which meets the requirements of Departmental Hazardous Waste Policy LEN-13. Therefore, the District can sign-off on this project and no additional preliminary testing for this project is necessary.

However, the findings of the report should be carefully considered.

PESA RESPONSE FORM

DATE:

9-25-95

TO: Gary Gould Attn.: Peter J. Frantz

FROM: D.P. Carlson By: Pat Pechnick 

PROJECT:

FAP 340 (FAP 431)
P-91-315-86
Lake - Will Freeway
From I-55 to I-80
Cook, DuPage, and Will Counties
ISGS #26

ACTION TO BE TAKEN

- ☐ 1. The district will not need right-of-way from the contaminated property.
- ☐ 2. The district will avoid acquiring the source of contamination and construction excavation will not exceed recommended depths.
- ☐ 3. A task order will be submitted for further investigation.
- ☒ 4. Other. See below
- _____
- _____

IF ITEM NUMBERS 3 OR 4 ARE CHECKED, PLEASE PROVIDE ONE COPY OF THIS FORM TO THE CENTRAL BUREAU OF LAND ACQUISITION, LISTING PARCEL NUMBERS AND RIGHT-OF-WAY JOB NUMBERS WHEN AVAILABLE

COMMENTS:

This project has been given to the ISTHA, & IDOT will not be conducting a PSI. This project has not been constructed.

PESA RESPONSE FORM

BUREAU OF PROGRAMMING

RECEIVED

Memorandum

FEB 16 1994

To: D. Carlson Attn: K. Hansen
From: Gary Gould By: Peter J. Frantz
Subject: Hazardous Waste Review
Date: February 14, 1994

DISTRICT #1

Refer to: FAP 340
Job No. P91-315-86
Keep~~aw~~ Mitigation
Will. Cook and DuPage Counties
ISGS #26C

Attached is a copy of the Preliminary Environmental Site Assessment conducted by the Illinois State Geological Survey (ISGS) for the subject project as described in your Hazardous Waste Survey Request.

Volatile organic testing was done for this project and the attached (ISGS) report indicates possible detection of contamination at four (4) sites. The report has assessed a high risk for this project and recommends that further soil boring and sample analysis needs to be performed to determine the precise nature and extent of the contamination if additional right-of-way is required at these locations.

It is the opinion of this office, in consultation with the Chief Counsel's Office, that if no underground storage tanks and if a purchase agreement can be secured from the current owner stipulating that all RCRA materials, storage equipment, and any surface contamination will be removed before title is taken, then no additional preliminary testing for the project is necessary. If the above stipulation can be met, then the project will be in compliance with Department Hazardous Waste Policy LEN-13. Also, if the stipulation can be met then the statewide consultant should be requested to perform a facility investigation just prior to closure. If the stipulations cannot be met, then the statewide consultant should be requested to perform additional investigations. Please notify this office of any actions you may decide to take concerning these sites (i.e., avoidance, further investigation, etc.). The attached transmittal form is provided for your convenience.

Memorandum

Page 2 of 2

Other findings and recommendations of the report should be carefully considered. A copy of the ISGS report has been sent to the State Fire Marshal as a complaint of a release. Although they have been asked to investigate at their earliest convenience, we can proceed using our own policy and procedures.

If you have any questions regarding this report or the tasking of the statewide consultant, please contact John Washburn at 217/782-7074 or Steven Gobelman at 217/785-4246.
